#### STROKE AVERAGE

Defined as the average number of strokes taken per round on The European Tour International Schedule.

#### DRIVING ACCURACY

Defined as both an average number of fairways per round and a percentage of fairways hit.

#### DRIVING DISTANCE

Defined as an average number of yards per drive. Two drives are measured per round on holes chosen to counteract the effect of gradient or wind. The drives are measured at the point they come to rest regardless of whether they are on the fairway or not.

#### GREENS IN REGULATION

Defined as both an average number of greens per round and a percentage of greens hit. A green in regulation is defined as the number of shots that a player should take to reach the putting surface on any given hole, being one for Par 3s, two for Par 4s and three for Par 5s.

#### PUTTS PER GIR

Defined as both the average number of putts taken per green in regulation and the average number of putts taken per round on greens that are hit in regulation. By doubling the greens per round figure and thereby assuming two putts on each green in regulation, we can then subtract the GIR putts per round figure from this total to infer the number of strokes under par the player will be per round from the greens hit in regulation.

#### AVERAGE PUTTS

Defined as the average number of putts taken per round. The use of the putter from off the green does not constitute a putt as far as the statistics are concerned.

#### SAND SAVES

Defined as a percentage of times which a player takes two strokes or less to complete a hole after visiting a greenside bunker, regardless of the score on that hole.

#### SCRAMBLES

The frequency, expressed as a percentage to one decimal place, of the player scoring par or better on holes where the player missed the Green in Regulation.

## THE EUROPEAN RYDER CUP TEAM QUALIFICATION FOR THE 36TH RYDER CUP

Selection for the European Team is based on points earned on The Ryder Cup World Points List and the European Points List.

The Ryder Cup World Points List is comprised of Official World Golf Ranking points won by a European Tour Member from each tournament in which he participates between September 1, 2005 and September 3, 2006.

For the final week of qualifying only, World Ranking Points will be awarded solely for the BMW International Open on The European Tour International Schedule. World Ranking points are allocated to all officially sanctioned tournaments (on any Federated Tour) and are allocated according to the event rating of the tournament.

The Ryder Cup European Points List is comprised of points (1 point = 1 euro) earned by a European Tour Member from all officially sanctioned events counting towards The European Tour Order of Merit between September 1, 2005 and September 3, 2006.

The final team will comprise:

(a) The leading five players on The Ryder Cup World Points List (1) as of Sunday September 3, 2006. In the event of a tie (equal number of points accumulated), placings will be decided by the player with the higher ranking on the Official World Golf Rankings as of Monday August 28, 2006.

(b) The leading five players, not otherwise qualified (having selected the five players from The Ryder Cup World Points List above), from The Ryder Cup European Points List as of Sunday September 3, 2006. In the event of a tie (equal number of points accumulated), placings will be decided by the player with the higher ranking on the 2006 European Tour Order of Merit as of Sunday September 3, 2006.

(c) In addition, two further selections will be made by The European Team Captain, Ian Woosnam.
